

# THE HIDE AND LEATHER HOUSE <sup>CO</sup> <sub>INC</sub>

ANNIVERSARY EDITION  
CELEBRATING 40 YEARS · SINCE 1978

• THE ONLY LEATHER CATALOG YOU WILL EVER NEED. •

Featuring over 3,000 Types of Leathers Available for All Industries  
Visit our website at [www.hidehouse.com](http://www.hidehouse.com)

## DEAR VALUED CUSTOMER:

We hope you enjoy our new full color catalog with a large variety of leather, accessories and tools to choose from. Our recent expansion and selection of quality leather and basic accessories assures you of one stop shopping for “all your leather needs.”

For your convenience we would like to reaffirm our leather grading policy. Leather, being “nature’s product” is subject to holes, blemishes and scarring. Our #1 grade will assure you of the best selection available for that type of leather. Our #2 grade may contain a brand, hole and/or healed scar. Our #3 grade, or economy grade hides, will have brands, holes and cosmetic defects. Some leather may not have a grade selection depending on quality available. **All prices are subject to change with market conditions!**

Please keep in mind that leather is an agricultural commodity and there will be times when we might be temporarily “Out of Stock”. Your understanding of this is appreciated. To expedite your orders, please refer to inventory stock numbers to assist us and avoid issues with color, weights, etc.

**To our long standing valued customers, we wish to thank you for your continued patronage.  
To our new prospective customers we appreciate your interest and look forward to serving you.**

## ADDITIONAL INFORMATION

Some leather prices are subject to discounts on volume orders of 500+ sq ft. Sample cards are available for \$20.00/each (which will be credited on your first purchase). Our business hours are Monday through Friday 8am-4:30pm.

All prices are subject to change without notice based on the hide market fluctuations.

International orders that contain game animal hides (deer, elk, bison) are subject to fish & wildlife regulations and an additional cost is required for shipping.

## TERMS

All first orders must be charged to a credit card or wire transfer. No CODs on first orders. COD orders can be processed but will include an additional shipping fee. International orders are “TT” wire transfer only. Terms of “due on receipt” and net 30 days are available for those who qualify. A \$30.00 credit report fee will be charged to those accounts who desire open terms.

Orders will not be shipped to accounts with past due balances.

## RETURN POLICY

We only accept returns within 30 days of original purchase. **All returns must be accompanied by a copy of your invoice or the return will not be processed!** If a copy is not available, you **MUST** obtain one and include it with your package. The leather must be in original condition. We will not accept any returns that have been cut into or marked on in any way. Returns received after 30 days are subjected to a 15% restocking fee. Return shipping charges are not paid for by Hide House unless we have shipped you the incorrect hides in error.

Please send all returns to the below address:

Attn: Return Department The Hide House  
595 Monroe St  
Napa, Ca 94559

**Visa, Mastercard, Discover and American Express are accepted.**

## OUR STORY: THE PAST, PRESENT, & FUTURE OF LEATHER

Situated in the spectacularly beautiful wine-growing region of the Napa Valley, *The Hide and Leather House* has a storied past in the history of the leather industry in California.

Long before the wine industry took prominence, the city of Napa, CA had a sizable leather industry that began on the banks of the Napa River in 1869. It was at that time that Sawyer of Napa was founded to process the abundance of raw material; i.e., sheep and cattle hides that the area provided. Soon, another tannery, Calnap Tanning Company was constructed to meet an ever-growing demand for leather on the West Coast. In its heyday, Napa employed hundreds of people involved in footwear, garments, personal leather goods, and glove making. In fact, our sister company, *Napa Glove Co, Inc.* (founded in 1888), was one of the first of five customers for the tanneries. So steeped in tradition is *The Hide and Leather House*, that the term “Nappa” leather is derived from our history of producing fine leathers and garments in Napa.

*The Hide and Leather House* was set up to act as a “factory outlet” for the two tanneries some forty years ago. Ceasing operations years ago, the tanneries no longer exist. However, *The Hide and Leather House* carries on the tradition by sourcing and importing leathers from around the world. Domestically, we do an abundance of “Contract Tanning” of various leathers including cowhide, deerskin, elkskin and bison.

Today, *The Hide and Leather House* offers one of the world’s finest selections of leathers – stocking well over 3,000 types of leathers with a consistency and a quality you can count on! No Customer is too small or too large for us to help. For those looking for one-stop shopping for all your leather needs, please call one of our friendly and knowledgeable Sales Reps. Our staff is ready to help. You will be amazed at what we have to offer! For both existing and potential customers, thank you for the opportunity to serve you! Please remember **“LEATHER IS BETTER!”**

## YARDAGE GUIDE

### SOFA

16 yards = 288 sq. ft.

16 yards = 288 s.f.      14 yards = 252 s.f.

### LOVESEAT

12 yards = 216 sq. ft.

12 yards = 216 s.f.

### SECTIONAL

32 yards = 576 sq. ft.

32 yards = 576 s.f.

### DINING CHAIR

3 yards = 54 sq. ft.

3 yards = 54 s.f.

### ARMCHAIR

5-6½ yards = 90-117 sq. ft.

5 yards = 90 s.f.

5½ yards = 99 s.f.

6 yards = 108 s.f.

6½ yards = 117 s.f.

## YARDAGE/LEATHER ESTIMATOR

The figures represent the approximate yards of 54" material and square foot of leather based on 1 YD = 18 Sq. Ft. needed to upholster the type of furniture shown.

With small hides, cutting pieces should be specified to obtain square footage.

As a rule of thumb, when ordering custom sofas, order approximately 2½ YDS/45 S.F. per linear foot.

### Leather Conversion Table

1 YD. = 18 S.F.	6 YDS. = 108 S.F.	11 YDS. = 198 S.F.	17 YDS. = 306 S.F.
2 YDS. = 36 S.F.	7 YDS. = 126 S.F.	12 YDS. = 216 S.F.	18 YDS. = 324 S.F.
3 YDS. = 54 S.F.	8 YDS. = 144 S.F.	13 YDS. = 234 S.F.	19 YDS. = 342 S.F.
4 YDS. = 72 S.F.	9 YDS. = 162 S.F.	14 YDS. = 252 S.F.	20 YDS. = 360 S.F.
5 YDS. = 90 S.F.	10 YDS. = 180 S.F.	15 YDS. = 270 S.F.	21 YDS. = 378 S.F.
		16 YDS. = 288 S.F.	22 YDS. = 396 S.F.

1 YD = 36" X 54" = 1994 Sq. In. ÷ 144 Sq. In. (12" X 12") = 13.5 Sq. Ft. – Order 18 Sq. Ft. – Diff = Loss Factor.

16	6.4	1/4	0.250	12.00
17	6.8	17/64	0.266	12.75

## DO IT IN LEATHER

Leather truly is a one-of-a-kind material. It's both strong and soft; it can breathe as well as insulate, it can *stretch*, but will not tear. With such diverse characteristics as these, it's no wonder so many products are made from leather. Leather making can be traced back to the earliest dawn of history – back to ancient Rome, the Hebrews, and even Adam and Eve. Today, we see leather everywhere – in shoes, jackets, gloves, furniture, bags – you name it, it's available in leather. As leather continues to grow in popularity, it will be available on more products and in more styles.

This is possible because leather is a uniquely versatile fabric. The functional, physical properties of leather are, for the most part universal, regardless of origin (cow, steer, goat, deer, pig, etc.). Leather offers the benefits of high tensile and tear strength, elongation, flexibility, puncture resistance, capacity to absorb and transmit moisture, breathing and insulating qualities and lasting molding abilities. For as long as leather has been around and used, there should be no mystery to it. But many don't realize or understand the amazing properties leather possesses, so here is a brief overview.

The *tensile strength* of leather or greatest longitudinal stress a substance can bear without tearing apart, is very high. Leather's unique physical structure is responsible for this. Nature created millions of coil-like molecules into tiny fibrous strands, twisting the strands together into bundles of fibers, and finally interweaving the fiber bundles about themselves in a three-dimensional manner. An untold number of interactions within the substance are a result of this intricate fiber network and results in a very high tensile strength.

Leather's ability to withstand tearing forces, or *tear strength*, is probably the one property most taken for granted, and it gives leather products exceptionally long life. The interwoven and locked fibers of leather form a random, three dimensional design. Because they are not oriented in any fixed directional pattern, there is no easy path for a tear to follow.

*Elongation* refers to a substance's ability to lengthen, or stretch, when stress is applied to it, and represents the maximum extent a material can stretch without breaking. Leather is seldom stretched to its maximum capacity allowing future stretching to occur if necessary. This is one reason why leather finds its way into so many different types of products.

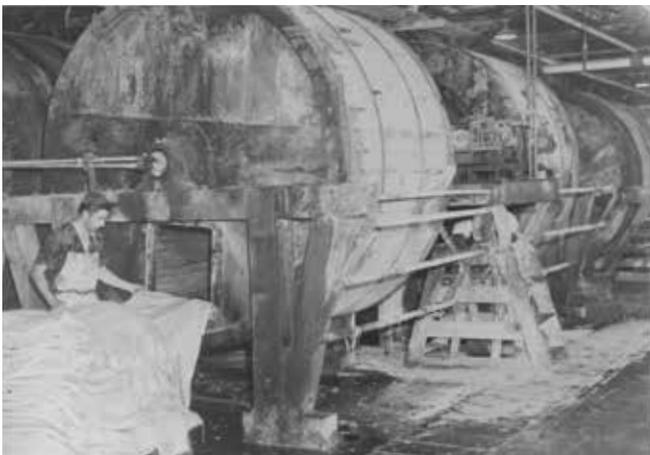

Leather also has natural properties of *flexibility*, which again originate from leather's unique matrix of fibers. This flexibility is maintained without failure through numerous flexings, temperature fluctuations, and moisture ranges. Leather boots, clothing and dog-sled harnesses used in the Arctic are prime examples of leather's performance under extreme conditions.

The irregular fiber pattern of leather also allows for incredible *puncture resistance*. Manufacturing a material that is both flexible and tough to puncture is quite difficult, but leather is naturally both. Leather's puncture resistance is especially evident when sewing – it's not easy to push a needle through leather.

The *capacity to absorb and transmit moisture* is another natural property of leather. It will absorb liquids, wick away water from damp material and pick up moisture from the humid air. Shoe manufacturers take advantage of leather's ability to absorb moisture. They often dampen upper leathers before molding because when the water content increases in leather, strength and elongation value also increases.

Leather has excellent *breathing and insulating properties* throughout all seasons. In warm seasons, leather allows skin moisture to evaporate through its pores. In cold seasons a comfortable temperature is maintained within the leather garment as the porosity acts as an insulation. The dense fiber structure of leather also provides a windproof feature unique to flexible, lightweight fabrics.

Another important characteristic of leather, especially in shoe-making, is its *lasting molding ability*. Leather can maintain a new shape and retain the valuable properties already mentioned. This truly is an incredible "feet."

## LEATHER CARE INSTRUCTIONS

### A: Protect against excessive sunlight, dryness and heat.

1. Sunlight will fade and dry out leather.
2. Dryness will cause leather to crack.
3. Heat will dry out the leather and cause further damage.

### B: How to remove spots and stains:

1. Blot excess liquid up as quickly as possible with a clean 100% cotton white absorbent cloth or sponge.
2. If necessary, use clean lukewarm water only and let dry naturally. Do not dry with hair dryer, etc.
3. If water is used, clean the entire area where spot occurred seat cushion, arm, etc. **Do not rub.**

### C: How to remove butter, oil or grease:

1. Wipe excess butter, oil or grease off the leather with a clean 100% cotton white dry cloth. Then leave it alone as the spot should dissipate into the leather in a short period of time.
2. Do not apply water or try to wash the butter, oil or grease spot.

### D: How to remove chewing gum:

Place ice cubes in a plastic bag and apply on the chewing gum. Wait several minutes, lift the ice bag and remove the chewing gum.

### E: General Care:

**DO NOT USE CHEMICALS, SADDLE SOAP, CLEANING SOLVENTS, FURNITURE POLISH, OILS, VARNISH, ABRASIVE CLEANERS, SOAP OR AMMONIA WATER.**

Vacuum as a routine cleaning. Keep moist. Humidify if climate is dry.

*These are recommended or suggested methods of cleaning. The Hide House is not responsible for damage incurred while cleaning. Always try the cleaning method in a hidden area first to see results.*

# ALLURE

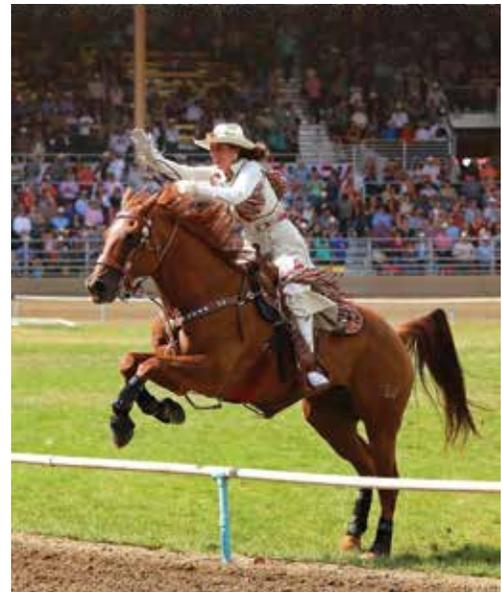

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 55-70 sq. ft.

A fabulous program of 104 colors! This unbelievable leather comes in whole #1 grade German hides and is considered amongst the finest semi-aniline in the world! It is absolutely perfect for all upholstery applications including automobile, furniture, marine & aircraft. This leather is so versatile, soft, & elegant it can easily be used for apparel, personal leather goods and anywhere timeless, classic leather is desired!

**DOVE**

**2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 50-60 sq. ft.**

A full grain, semi aniline vat dyed leather with a superb soft touch and feel. American dairy cows are meticulously selected for this article to give it a naturally even pebbled grain. Excellent wearability and added durability due to the high performance characteristics added during the finishing process. For use in the contract, hospitality, and residential markets! Once upholstered, the leather will give any project a sophisticated look with an excellent drape and feel. Also great for chaps and handbags.

Whole Hide Cow

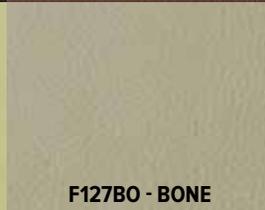

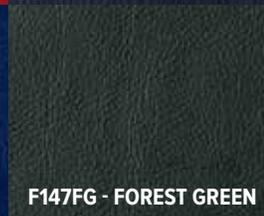

# NASSA

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 40-55 sq. ft.

This value priced leather can be used for motorcycle racing leathers, upholstery, chaps and an abundance of leather goods. A superb program offering great cutting and yield at a wonderful price point. Has a nice protective finish.

## BUTTERBALL

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 45-55 sq. ft.

A natural, semi-aniline, milled, full grain leather with a touch as delicious as the name. Excellent for chaps, footwear, handbags, luggage, non-commercial upholstery application, and personal leather goods. Absolutely magnificent leather with a "silky feel" and smooth flat grain. **Also available in half hides - Average hide size 22-28 sq. ft.**

Whole Hide Cow

## DA VINCI

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 55-65 sq. ft.

This is a semi-aniline leather with a light wax finish which makes it more resistant to fading and scratching. Done on German raw material.

Whole Hide Cow

## OLD ENGLISH

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.

Beautiful leather combining traditional craftsmanship with modern tanning and finishing technology. This fine leather has a distinctive appearance. The surface is then enhanced with a polished sheen which accents the intricate blending of the dyes.

Whole Hide Cow

## MILAN

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.

Distressed, oily pull-up leather that features a natural grain and a transparent look. It highlights the hand crafted nature of upholstery with its aged appeal. Color tone may lighten when upholstered.

Whole Hide Cow

Actual leather colors may vary from pictures shown.

## ABSOLUTE

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.

Vibrant, rich leather in a class of its own. A unique finish done with oils and waxes with an extreme heat application that creates an almost "patent leather" look. A very light pull-up adds additional depth and transparency within the clear finish. A leather like no other!

Whole Hide Cow

## ROCKY

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.

One of the hottest leathers for upholstery. An innovative hot wax tannage technique highlights the natural tones and rich colors that will only be enhanced over time in both feel and appearance. A thinner version of our Napa Excel.

Whole Hide Cow

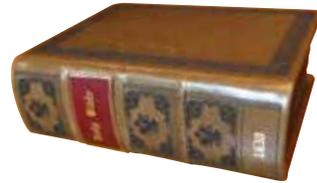

RO10 - BROWN

## DIABLO 2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.

A full aniline leather with a waxy, clear top coat. Has a polished, transparent rich look and feel. Tanned in Italy, these hides have a soft/medium temper that after upholstered will mellow after being upholstered. Improves with age! Also excellent for boots, handbags and wallets.

Whole Hide Cow

## PARLIAMENT

**2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.**

Full grain, full aniline leather done on European cowhides. Has a unique topcoat that is created with wax as well as extreme heat and pressure. The finished effect is a clear transparent surface with a smooth hand and a beautiful appearance.

Whole Hide Cow

## DUBLIN

**3.5 - 4 oz. (1.4 - 1.6 mm) Average hide size 50-65 sq. ft.**

Produced on full-grain European cowhides. A natural-milled texture with a "full body" feel. Hard wax tannage adds light polish to provide texture and slight contrast in tone. This is an absolutely gorgeous leather that is phenomenal for both upholstery, bags and personal leather goods.

Whole Hide Cow

*Actual leather colors may vary from pictures shown.*

## ANILINE

**2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 50-65 sq. ft.**

This is the essence of leather! Gorgeous full European hides. This is a full aniline leather, subject to color variation and natural character. Excellent for upholstery, bags and chaps. This is one of our best selling programs due to it's versatility and incredible yield! With an unreal feel, you have to try this one!

Whole Hide Cow

AN10 - BLACK

## NUBUCK

**3.5 - 4 oz. (1.4 - 1.6 mm) Average hide size 55-65 sq. ft.**

Top-grain leather that has been sanded or buffed on the grain side to give a slightly short nap, producing a velvet-like surface. It is resistant to wear, and is perfect for a wide variety of uses including upholstery, shoe & boot, bags and personal leather goods.

Whole Hide Cow

NU10 - BLACK

## MILLED VEG TAN

**2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 38-45 sq. ft.**

100% veg hides are milled for a soft temper. Great for those who want to upholster and stain on them! Also good for lining.

Whole Hide Cow

860MIL

## RENAISSANCE

**2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.**  
 European raw material with a full color penetration. An “antiqued” modeled look with a soft touch.

Whole Hide Cow

## OUTLAW

**2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 50-60 sq. ft.**  
 A semi-aniline leather with a waxy crackle effect. The distinctive qualities of this article are its silky feel and its gentle matte finish. It has been designed to resist scratching and have virtually no color variation.

Whole Hide Cow

## WORLD WAR II

**2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 45-50 sq. ft.**  
 Soft distressed leather. The bomber jacket look.

Whole Hide Cow

Actual leather colors may vary from pictures shown.

**TOMBSTONE** 2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 40-50 sq. ft.

Classic “distressed” upholstery leather. Pure aniline, full-grain cow hides. Has a natural character that gives it an aged appearance. Its surface will lighten and darken with use, becoming more distressed over time. Considered a “naked” leather with a minimum amount of protection, it is meant to scuff, stain and will contain some healed scars so that it appears more worn with use. The pull-up characteristics of this leather will also provide contrast in both luster and color.

Whole Hide Cow

**SONOMA**

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 30 - 38 sq. ft.

This leather is done on full kip hides and has a tighter grain. A light leveling coat that ensures color consistency and optimum cutting with a terrific hand. One of our personal favorites due to its luscious touch.

Whole Hide Cow

## EXPLORE

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 20-25 sq. ft.

A version of our Aniline full hide program. The sides have a wonderful hand. Note: May contain a blemish or two as this leather is naked! This is a great value priced leather with a delicious touch!

Note: Some colors available in whole hide.

Side Cow

## EXPLORE LIGHT WEIGHT

2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 20-25 sq. ft.

Now available in two light weight colors.

Side Cow

Actual leather colors may vary from pictures shown.

## HORNBACK

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 20-25 sq. ft.

This is a gorgeous, soft, naked cowside with an embossed hornback pattern that is ideal for accents on chaps and bags.

Side Cow

Side Cow

## FLORAL

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 20-25 sq. ft.

This is a gorgeous, soft, naked cowside with an embossed floral pattern that is ideal for accents on chaps and bags.

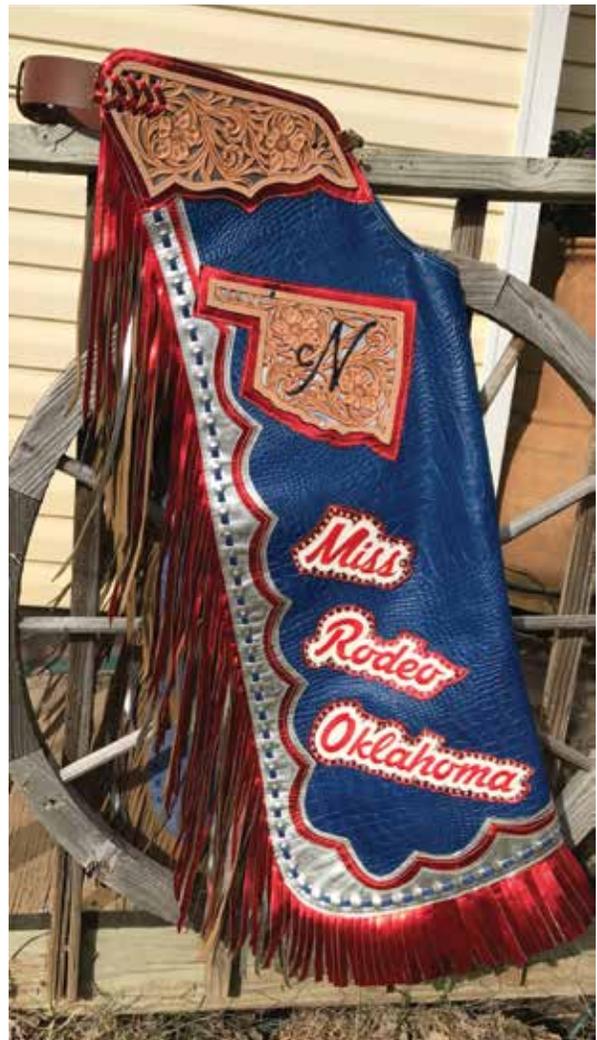

# CROCO

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 18-25 sq. ft.

Medium temper leather for everything from footwear, personal leather goods, motorcycle/saddle seating and more.

Side Cow

Actual leather colors may vary from pictures shown.

### ITALIAN GATOR

2.75 - 3.25 oz. (1.1 - 1.3 mm)

Average hide size 35-45 sq. ft.

Available in three rustic embossed gator designs. This leather maintains a soft-medium temper.

Whole Hide Cow

IG001 - BLACK

Soft, perforated leather. Great for upholstery, gloves and all leather goods.

Side Cow

P30 - BLACK

P31 - RED

# ITALIAN CROCO

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 35-50 sq. ft.

The look of real crocodile! Hand stained to give a two tone effect. Ideal for upholstery, bags and chap trim. Excellent for those going after the luxury leather goods, with a great market value!

Whole Hide Cow

IC10 - BLACK

Actual leather colors may vary from pictures shown.

### PRETTY PATENT

**2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 18-25 sq. ft.**  
 Traditional patent leather featuring several layers of lacquer that makes this a specialty. Serving the footwear, fetish and personal good industries. Black is also available in 4-5 oz. and 7-8 oz.

### NEON

**3 - 3.5 oz. (1.2 - 1.4 mm) Average hide size 20-25 sq. ft.**  
 Fun fluorescent colors perfect for the motorcycle racing crowd.

### MAGNIFICENT METALLIC

**3 - 3.5 oz. (1.2 - 1.4 mm) Average hide size 18-25 sq. ft.**  
 Brilliant colors guaranteed to make your product stand out. Medium temper, foiled on a natural crust.

# SOFT METALLIC

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 20-28 sq. ft.  
 Beautiful, soft, grainy metallic. Great for bags and chaps. Not to be used for high traffic upholstery applications.

Side Cow

Actual leather colors may vary from pictures shown.

## CAMO

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 18-25 sq. ft.

Natural pebble grain camouflage leather. A dream for designers. Has a soft hand.

Side Cow

## DESIGNER DELIGHT

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 20-25 sq. ft.

Perfect for bags, chaps, footwear and personal leather goods. Leather with an extra flair for those seeking a beautiful palette of fashion colors.

Side Cow

# PHOENIX

3 - 3.5 oz. (1.2 - 1.4 mm) Average hide size 18-25 sq. ft.

Corrected grain leather. This is the perfect motorcycle leather. For those looking for a great deal, works for all types of applications. Great yield!

Side Cow

Actual leather colors may vary from pictures shown.

# MOTOCHAP

3 - 3.5 oz. (1.2 - 1.4mm) Average hide size 23-32 sq. ft.

Beautiful drum dyed natural full grain leather. Wonderful for bags, upholstery, chaps and all motorcycle applications! We are the undisputed Kings in the United States for this type of leather! Hugely popular!

## METALLIC PLONGE

**1.5 - 2 oz. (0.6 - 0.8 mm) Average hide size 20-25 sq. ft.**  
 Lightweight, but a strong beautiful leather! Same attributes as our traditional Plonge but with a knockout metallic finish!

Sides Cow

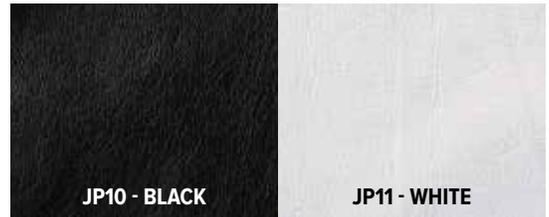

## JAPANESE PLONGE

**1.25 - 1.5 oz. (0.5 - 0.6 mm) Average hide size 20-28 sq. ft.**  
 Very thin, durable leather with an incredible silky feel. Considered the world's finest garment cowhide.

Sides Cow

## NEVADA

**2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 22-25 sq. ft.**  
 Soft, aniline sides that are a "kissing cousin" to our Explore product in a slightly lighter weight.

Sides Cow

Actual leather colors may vary from pictures shown.

**LAMB 1.5 - 2.5 (0.6 - 1.0 mm) Average hide size 7-10 sq. ft.**

Garments take center stage with lamb's special qualities of softness, color, rich look and feel that give these hides their distinct character. These are premium hides that are processed in the tradition of Italian craftsmanship. Done with a semi-aniline finish.

## PEARLIZED LAMB

1.5 - 2.5 oz. (0.6 - 1.0 mm) Average hide size 7-10 sq. ft.

Lightweight, soft lamb with a pearlized finish. One of the hottest looks.

Whole Hide Lamb

## PRINTED LAMB

2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 7-10 sq. ft.

Great, defined embossed details for creating a unique look.

Whole Hide Lamb

Actual leather colors may vary from pictures shown.

### METALLIC LAMB

2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 7-10 sq. ft.  
Fun soft metallic foil finish!

Whole Hide Lamb

### MENDOCINO SHEEP

2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 8-10 sq. ft.  
Perfect for garments on both sides. These will help you in creating enchanting articles. The flesh side "reverse" is nicely distressed for that special effect.

Whole Hide Sheep

### ROUGH RIDER SHEEP

2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 8-12 sq. ft.  
A unique, distressed worn look.

Whole Hide Sheep

**PIGSUEDE 1.5 - 2 oz. (0.6 - 0.8 mm) Average hide size 11-15 sq. ft.**

Super soft, form fitting, perfect for that special garment. Easy to sew. These symmetrical shaped hides are double-buffed for a silky suede that is unmatched! This is an excellent leather to use for those desiring super strong yet light weight suede for garments or lining.

## CRAFT DEER

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 4-8 sq. ft.

Our craft grade offers value priced deerskins for craft, hobby and trim use. These hides will definitely contain blemishes, bullet holes and can be odd shaped pieces.

Whole Hide Deer

## MULE DEER

3 - 3.5 oz. (1.2 - 1.4 mm) Average hide size 10-13 sq. ft.

Larger thick Deer hides, very similar feel to farm raised. Beautiful, soft and tough. A great alternative to Elk.

Whole Hide Deer

## ELK

**3 - 4 oz. (1.2 - 1.6 mm) Average hide size 18-25 sq. ft.**

Elk is a game animal and lives in a natural environment. These hides are subject to having scratches and holes. Wonderful for bags and chaps for those who don't mind an occasional blemish. Seasonal availability, call to inquire.

Whole Hide Elk

## CRAFT ELK

**3 - 4 oz. (1.2 - 1.6mm) 15-24 sq. ft.**

Our craft grade offers value priced Elk for crafts and hobby. Also good for trim. **These hides will contain holes and blemishes.**

Whole Hide Elk

### WATER BUFFALO CALF

2.75 - 3.25 oz. (1.1 - 1.3 mm) Average hide size 18-24 sq. ft.

A high shine leather with a smooth unique grain. Makes beautiful and unique boots and small leather goods.

Whole Hide Calf

### FRENCH CALF

3 - 3.5 oz. (1.2 - 1.4 mm) Average hide size 15-20 sq. ft.

Matte finished leather to be used in footwear and personal leather goods. Medium temper with a tight grain. Premium leather for a top of the line product.

Whole Hide Calf

### KIDSKIN

2 - 2.5 oz. (0.8 - 1.0 mm) Average hide size 5-7 sq. ft.

Perfect for wallets, personal leather goods and some footwear applications.

Whole Hide Goat

## ORTHO LINING

Average hide size 22-25 sq. ft.

Beautiful sides with all the traditional characteristics that the medical trade looks for.

Side Cow

## ORTHO CRESTAN

4 - 5 oz. (1.6 - 2.0 mm) Average hide size 22-28 sq. ft.

This traditional orthopedic leather is a perfect choice for brace work. Corrected grain ensures that you have a perfect cutting! This leather has other applications when you desire firm tempered leather.

Side Cow

## COW LINING

2.5 - 3 oz. (1.0 - 1.2 mm) Average hide size 18-25 sq. ft.

Medium temper. Great to line boots, shoes and other leather goods.

Whole Hide Cow

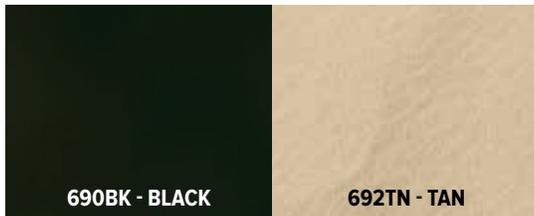

## PIG LINING

1.75 - 2 oz. (0.7 - 0.8 mm)

Average hide size 14-18 sq. ft.

Whole Hide Pig

## INTRODUCING EXPANDED LINEUP OF NORTH AMERICAN BISON

Genuine American Bison is without a doubt, unique leather. It has incredible strength over traditional cowhide leather. Its unparalleled softness, strength and durability shows the beautiful and unique grain of Bison leather.

The leather we use is a byproduct of free range Bison raised for meat consumption. Our leathers are treated with an elaborate environmentally friendly tanning process resulting in the highest quality leather. This leather will only improve its look and feel with wear and time.

## NAVAJO BISON

3.5 - 4 oz. (1.4 - 1.6 mm) Average hide size 40-45 sq. ft.

Our finest vegetable tanned American Buffalo. Beautiful unique characteristics only Bison can provide.

Whole Hide  
Bison

## APACHE BISON

4 - 5 oz. (1.6 - 2.0 mm) Average hide size 35-45 sq. ft.

A medium temper with a smooth grain and antique look. Vegetable tanned with a nice pull up.

Whole Hide  
Bison

## IOWA BISON

5 - 6 oz. (2.0 - 2.4 mm) Average hide size 18-22 sq. ft.

A lightly oil tanned leather, great for shoes and bags.

Side Bison

Actual leather colors may vary from pictures shown.

### CHIPTAN BISON

4 - 5 oz. (1.6 - 2.0 mm) Average hide size 18-22 sq. ft.  
Has a clear, wax finish with a nice pull-up. A medium-tempered leather available in this one beautiful color.

Side Bison

BC10 - BURNT

### TUCSON BISON

4 - 5 oz. (1.6 - 2.0 mm) Average hide size 15-20 sq. ft.  
A beautiful shrunken grain with a transparent waxy top.

Side Bison

BT50 - BLACK

BT51 - CHOCOLATE

BT52 - PEANUT

BT44 - OLIVE

BT45 - BLACK CHERRY

BT47 - TEAL

## GARMENT BISON

**3 - 4 oz. (1.2 - 1.6 mm) Average hide size 18-22 sq. ft.**

A light weight American Bison that finally works for garments, chaps, bags and personal leather goods!

Side Bison

## MOCCASIN BISON

**8 - 9 oz. (3.2 - 3.6 mm) Average hide size 18-22 sq. ft.**

Great marketing value for your products! This is unique leather that only North America can offer! Bison is considered the Granddaddy of the country's top custom moccasin makers.

Side Bison

*Actual leather colors may vary from pictures shown.*

## LAREDO BULLHIDE

5 - 6 oz. (2.0 - 2.4 mm) Average hide size 22-28 sq. ft.

Soft-medium temper leather with a bubble grain effect. Meant to replicate the look of bison. Great for bags and personal leather goods.

Side Bullhide

## BULLHIDE

6 - 8 oz. (2.4 - 3.2 mm) Average hide size 22-28 sq. ft.

Soft, form fitting, this is the ideal moccasin leather! Great tensile strength offers opportunities for other applications as well. This leather has been used for heavy western chaps and fashion belts. This leather is hard to find anywhere else!

Side Bullhide

## BULLHIDE HEAVY

**8 - 9 oz. (3.2 - 3.6 mm) Average hide size 22-28 sq. ft.**  
 Great choice for heavy moccasins, dog leads, fashion belts and bags. A pretty natural pebble grain makes for a distinctive appearance.

Side Bullhide

## KODIAK BULLHIDE

**5.5 - 6 oz. (2.2 - 2.4 mm) Average hide size 22-28 sq. ft.**  
 An excellent and unique leather for personal leather goods. Contains a mild embossed print to give maximum cutability. Medium-firm temper.

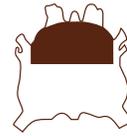

Side Bullhide

### AZTEC DOUBLE SHOULDERS

5 - 6 oz. (2.0 - 2.4 mm) Average hide size 9-12 sq. ft.

A fashionable look for both men and women's belts. A mellow temper in a natural shrunken grain. Becoming popular for luggage applications because of its gorgeous grain.

Double Shoulder Cow

### AZTEC DOUBLE SHOULDERS-HEAVY

8 - 9 oz. (3.2 - 3.6 mm) Average hide size 9-12 sq. ft.

A fashionable look for both men and women's belts. A mellow temper in a natural shrunken grain.

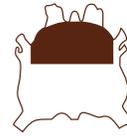

Double Shoulder Cow

### BELT DOUBLE SHOULDERS

8 - 9 oz. (3.2 - 3.6 mm) Average hide size 10-14 sq. ft.

Drum dyed, veg tan shoulders, ideal for belts. A super trim means very little scrap on the cutting room floor. Already colored so you don't have to!

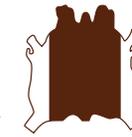

Double Shoulder Cow

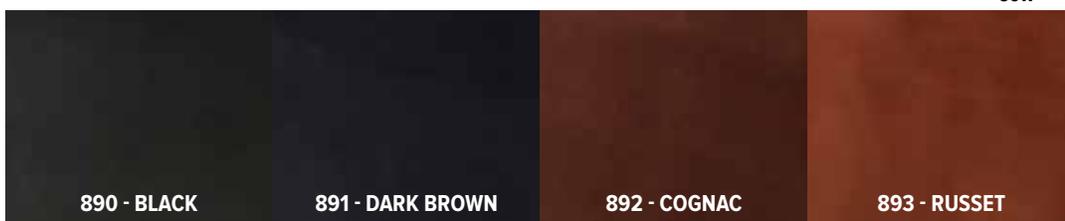

### MONTEREY DOUBLE BACKS

8.5 - 9.5 oz. (3.4 - 3.8 mm) Average hide size 32-37 sq. ft.

Has the added advantage that they can be cut both vertically and horizontally! Measures about 6.5 feet long by 5.5 feet wide.

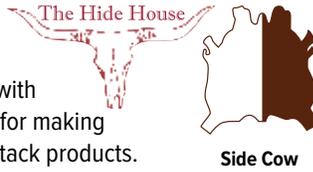

Double Back Cow

## CALIFORNIA LATIGO

Average hide size 20-25 sq. ft.

This is our famous "Salz" latigo that originated with California's first and last tannery. The #1 choice for making men's belts, motorcycle saddle bags and some tack products. Makes great straps!

### BLACK

- CLBK45 4-5 oz. (1.6 - 2.0 mm)

## CUSTOM HIDE HOUSE GLUE

#GL8 - 8 OZ.  
#GL16 - 16 OZ.

Premier water based cement for combining or laminating leather, rubber, foam, etc. When applying, spread on BOTH pieces of leather! Has a tough firm strength. Keep product from freezing. Available in 8 oz. and 16 oz.

## LEATHER AMORE

#LIQAMORE - 8 OZ.

Amore keeps fine leather elegant. All purpose cleaner and conditioner.

## SKIDMORE'S LEATHER CREAM

#LIQSKID

Skidmore's leather cream softens and conditions both vegetable and chrome tanned leathers, restoring both luster and softness. This product does not contain any pore clogging silicones.

FOR MANUFACTURERS AND RESELLERS, SKIDMORE IS OFFERED IN TWO DIFFERENT LID LABELS-ONE FOR THE TACK TRADE AND ANOTHER FOR THE BIKER TRADE.

This is an unreal product. Try it!

## CLEANER

#CLEAN

An all-natural leather cleaner from Bee Natural Leather Care. Advanced formula cleans most all leathers including top grain, exotic, naked, furniture, garment and moccasin leathers. Great on suedes and nubucks, aniline, deerskin, and more!

## PROTECTOR

#PROTECT

An all-natural leather protector from Bee Natural Leather Care. Advanced formula makes most all leathers water and stain resistant without color change. For use on all top grain, distressed, exotic, naked, furniture, garment and moccasin leathers.

## PRESS PUNCH

#TLPUNCH2

This new style punch is specifically designed for punching holes in soft and thin leather. The press "barb" is needle sharp and cleanly cuts a hole when pressed into the selected size hole on the rotating anvil. This is the perfect tool for deer, elk, light weight suedes and leathers.

Hole Sizes: 3.4mm, 1.95mm, 1.25mm, 1.1mm, and .085mm

Clean cuts down to the smallest sizes.

(NOT to scale)

## CANTILEVERED PUNCH

#TLPUNCH

This unique, high quality punch offers the easiest squeeze of any punch on the market today. The cantilever design allows the user to punch holes in leather weights up to 16 oz.

Tubes are NOT replaceable.

Hole Sizes: 2mm, 2.5mm, 3mm, 3.5mm, 4mm, 4.5mm

## ROTARY PUNCH

#TL155 / Osborne No. 155

Six tube punch made with tubes 1, 2, 3, 4, 5, 6 or 0, 1, 2, 3, 5, & 7. This punch is known as the best Revolving Punch made. The frame is made of forged steel, highly polished. Cutting tubes are turned from special carbon tool steel and threaded to allow easy replacement. These tubes are individually hardened. The reach and distance from the cutting tube to the back of the jaw is 1 1/2". Weight each is 14 oz. Size 0 to 7 provided unless specified otherwise.

Stock #	Description
TL155-1-6	Revolving Punch
TL155-0-7	Revolving Punch
TL155-A	Extra Anvil
TL155-HS	Extra Handle Spring
TL155-SS	Extra Side Spring
TL155-T	Extra Tube (Indicate Size)

**Note:** Numbers 155 and 153 tubes are not interchangeable. No. 155 punch takes tubes up to size 6 and 7 only as indicated on the cylinder of the punch. Punch tubes measure 3/4" overall.

#TBLADE1-M

Replacement industrial carbon injector blade for #TLSKIFE (1,000 pack) 5/16" x 7/8"

### HAMMERS & MALLETS

#TL196-4 / Osborne No. 196 #4 Mallet

Rawhide mallet. 2" face. Tightly rolled rawhide. The best quality on the market.

Face: 2", Handle Length: 10"

### TUBULAR RIVET SETTER

#TL443 / Osborne No. 443

For use with loose leaf binders.

Osborne No.	Overall Length (inches)	Shank Diameter (inches)
443	4	3/8

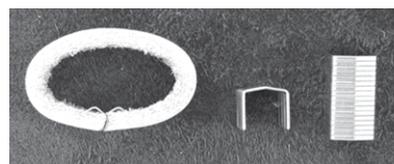

### STAPLER & STAPLES

#TLSTAPLER

Just the tool for making those bothersome belt keepers. This plier stapler uses 3/8" crown, flat wire staples in either 1/4" or 3/8" leg length. "Out of box", this stapler allows the user to attach keepers down to 5/8" width and with a very slight modification\* can be used on keepers down to 1/2" width.

\*Modifications void all manufacturer and distributor warranties for replacement of stapler or parts.

#HWSTAPLE1/4

For leather weights of 6/7 oz. and down.

#HWSTAPLE3/8

For leather weights of 6/7 oz. to 12/13 oz.

## THERE IS NOTHING LIKE LEATHER!

Leather is a product of nature. Take a piece of leather and observe the way the fibers are knit together. It is nature's work. It is so wonderful that man cannot hope to reproduce it. He cannot even recreate it. Boil a piece of hide or skin; it will turn into gelatine. No power known to man can turn that gelatine back into leather. Shred it; no machine can reweave the fibers into their former wonderful fabric. Take all the chemicals which go to make up a piece of leather, and mix them in all the ways that can be imagined and man cannot make a single inch of leather.

### Process Flow Sheet

*Wet Operations:* Receiving and storage of raw hides, soaking, unhairing, bating, pickling, tanning, wringing and sorting, trimming and siding, splitting and shaving, retanning/coloring/fat liquoring, setting out.

*Dry Operations:* Drying, conditioning, staking, buffing, finishing, plating, grading, measuring.

## TERMS RELATED TO TANNING PROCESS

**Aniline Finish** – The highest quality, softest and most natural leather with minimal processing. This leather is dyed exclusively with soluble dyes instead of pigmented sealants, is completely naked.

**Bark Tanned** – Leather which has been tanned with vegetable/ bark materials that are derived from certain plants and woods.

**Boarded** – A grain effect produced by folding a skin grain against grain and mechanically rolling the two surfaces back and forth against each other.

**Chrome Tanned** – Leather tanned with soluble chromium salts, primarily basic chromium sulfate. Currently the most widely used tannage in the USA.

**Combination Tanned** – Leathers tanned with more than one tanning agent. For example, initially chrome-tanned followed by a second tannage (called Re-tan) with vegetable materials.

**Corrected Grain** – Top Grain leather that has an imitation grain embossed onto the hide.

**Drum Dyed** – Leathers that are dyed in coloring drums to the point that the flesh side on reverse matches the same color as the grain side. Note – this does not ensure that the leather is “struck thru” so you may be able to see a chrome line in the center.

**Embossed/Debossed** – A mechanical process of permanently imprinting a great variety of unique grain effects into the leather surface. Done under considerable heat and pressure.

**Full Grain** – The absolute top layer of the hide in which only the hair has been removed. Usually carries either an aniline or glazed finish.

**Glazed Finish** – Similar to an aniline finish except that the leather surface is polished to a high luster by the action of glass or steel rollers under tremendous pressure.

**Grain Leather** – Hides and skins which have been processed with the grain (or outer surface). Dressed with the grain side outward.

**Imitation** – A variety of materials which have been made to resemble genuine leather. The great bulk of these are rubber or plastic-coated fabrics. It is unlawful to use terms connoting leather to describe limitations.

**Latigo** – See Combination Tanned.

**Leather** – The pelt of an animal which has been transformed by tanning into a non-putrescible, useful manner.

**Mineral Tanned** – Leathers which have been tanned by any of several mineral substances, notably the salts of chromium, aluminum and zirconium.

**Nubuck** – Grain leather which, in addition to hair removal, has had the outer surface removed by light buffing.

**Oil Tanned** – Leathers tanned with certain oils. Produces a soft, pliable leather.

**Pigmented Finish** – A protective surface coating is applied over the pigmented leather, providing resistance to scuffing or fading.

**Re-Tan** – See Combination Tanned.

**Semi-Aniline** – A light pigmented coating helps protect, smooth and create an even color while keeping the natural characteristics of the leather.

**Side of Leather** – leather which, prior to processing has been cut in half down the backbone forming two “sides”. Usually done on cattle hides. Purpose is to reduce the size to better accommodate tannery equipment. Represents the largest volume of commercial leather currently being produced.

**Split** – The underneath layer of side leather which has been “split” off. Devoid of a natural grain, it will be suede on both sides.

**Suede** – Leathers that are finished by buffing the flesh side (opposite grain side) to produce a nap. The term refers to the napping process and is unrelated to the type of skin used.

**Synthetic** – See Imitation

**Top Grain** - Leather in which the natural grain on the top surface has been sanded away. Imitation grain is embossed into the leather to give a more uniform look, but no genuine grain remains.

**Vat Dyed** – Exactly the same process as Drum Dyed with the exception that enough dyes are added to ensure that the hide is dye struck thru. If cut into, you will not see any white chrome line. The color is fully penetrated.

**Vegan Leather** – See Imitation

**Vegetable Tanned** – Leathers which have been tanned with vegetable materials that are derived from certain plants and woods.
